Skills

- Advanced understanding of the core features of the Ruby programming language.
- Advanced understanding of JavaScript core language concepts — DOM manipulation, Fetch API, ES6+ features.
- Advanced understanding of React/Redux as well as experience with responsive design interface development.
- Advanced understanding of the Ruby on Rails web framework.
- Strong understanding of fundamental database concepts – relational (SQL) databases, NoSQL databases, ORMs/ODMs, and Web storage APIs (front end).
- Working knowledge of unit, integration, e2e, and UI testing, with RSpec & Capybara.
- Advanced understanding of the Linux System Administration.

Work Experience

Technical Support Engineer - (April 2020 - Present)

Microverse(Remote)

Responsibilities:

- Ensuring the quality of source code and conducting source code and UI reviews.
- Providing feedback that recommends necessary changes to students' projects.
- Using GitHub and Slack to give students quick answers to project-related issues.
- Offering 1 on 1 assistance to students that need extra support through zoom calls.

Freelance Developer - (April 2019 - Present)

- I am a freelance web developer that takes on short and long-term projects in web development from various clients on a contract basis.

IT Consultant/Support technician - (January 2016 - July 2019)

Ecole Française "Les Grands Lacs": French School of Kampala(Part-time)

- I recommended and implemented IT solutions that improved the productivity of both staff and students.
- Maintained all the IT equipment, monitored and resolved network performance issues, and carried out regular software/system upgrades/updates which in turn improved the reliability and uptime especially for the network.

- Implemented and sensitized colleagues about a ticketing system that made it easy for the community to report technical issues and track them.
