SUMMARY

I am a detail-oriented, big picture thinker with a passion for web development. As an experienced technical support professional and full-stack developer, I am motivated to write and develop simple and usable software solutions.

SKILLS

Front-End: JavaScript, React.js, Redux, HTML5, CSS3, Boostrap
Back-End: Ruby, Rails, MySQL, PostgreSQL, Node.js
Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Capybara, Jest
Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

CAREERFOUNDRY   Remote
Mentor (Web Development)   January 2021 – Present
- Providing motivational feedback and advice to students both in writing and via video calls on creating an industry-ready portfolio of project work in line with current standards and best practices.
- Crafting individualized video reviews of student work, highlighting creative successes and areas for improvement to showcase in-demand skills and design processes.
- Working closely with tutors to evaluate student work and give actionable suggestions to improve the quality of student submissions.
- Applying extensive industry experience to guide students on potential career paths within web development.

MICROVERSE   Remote
Technical Support Engineer & Mentor (Volunteer)   April 2020 – Present
- Performed over 200 code reviews and provided actionable feedback to various developers in the community, which encouraged the growth of the developers.
- Provided 1:1 support to various developers in the community using slack and zoom to help them find answers to project-related issues.
- Helped junior developers with debugging/resolving technical blockers and guided them on following programming best practices.

ECOLE FRANÇAISE "LES GRAND LACS"   Kampala, Uganda
IT Technical Support Specialist   January 2016 – July 2020
- I recommended and implemented IT solutions that improved the productivity of both staff and students.
- Maintained all the IT equipment, monitored and resolved network performance issues, and carried out regular software/system upgrades/updates, which in turn improved the reliability and uptime, especially for the network.
- Implemented and sensitized colleagues about a ticketing system that made it easy for the community to report technical issues and track them.

EDUCATION

MICROVERSE   August 2019 – October 2020
Remote Full Stack Web Development Program, Full Time

BUSITEMA UNIVERSITY
Degree, Computer Engineering   August 2010 – October 2016
